

Quality & Certification

Inspection reports, testing procedures and quality assurance documentation for precision watch components.

QC Process

- 1 Incoming Material Inspection (IQC) – verification of raw material quality
- 2 In-Process Quality Control (IPQC) – monitoring during CNC machining and assembly
- 3 Final Quality Control (FQC) – comprehensive inspection before shipment
- 4 Outgoing Quality Control (OQC) – final verification and packaging check

Inspection Standards

- 1 Dimensional inspection using precision measuring instruments
- 2 Surface finishing inspection for scratches, color and coating consistency
- 3 Functional testing for fit, durability and performance
- 4 Sampling based on international AQL standards

Inspection Report Sample

Inspection reports include product specifications, measurement data, tolerance verification, defect records and approval signatures.

Certifications

- 1 ISO 9001 – Quality Management System
- 2 RoHS / REACH compliance (if applicable)
- 3 Material certification reports available upon request

Quality Commitment

We are committed to delivering consistent, high-quality products through strict quality control systems and continuous improvement.
